GENERAL AVIATION BUILDING AND ANEXES BUILDINGS SURFACE AREA	2,276 SQUARE METERS

- Tijuana International Airport is considered a border airport, due to its geographical location, and the characteristics of the services provided.
- Located in the main city of the state of Baja California Norte.
- Economic development is based on its trade with California, its tourism and the electronic off-shore (or *maquila*) manufacturing industry.
- The profile of the passengers is mostly that of migrants, or persons that seek to cross to the border to the U.S. to obtain work.
- As a result, the cities with the best options for air travel are those with the greater number of migrants.

Monitoring Quality of Service

Continuity through:

- Complains and Suggestions Box
- Passenger Surveys
- Airline Surveys

1. Compliance with the obligations of the concession
2. Expenditure in the investments in the MDP
3. Facilitating airlines' ability to increase their operations and thus the volume of passengers and cargo to and from Tijuana
4. Continue to explore new business opportunities that will translate into greater business income
5. Maintain the certifications already achieved, and continue to work to achieve pending ones, which will result in quality standards of excellence in services
6. Maintain security and safety standards
7. Continue community programs to continue to combine both the airport and the community
